Note: This device has been tested and complies with the limits for Class B digital devices as set forth in Part 15 ofthe FCC Rules. These limits are designed to provide reasonable protection against harmful interference in aresidential installation. This device generates, uses, and can radiate radio freguency energy, and if not installed ancused in accordance with the instructions, may cause harmful interference to radio communications. However, thereis no guarantee that interfer-ence will not occur in a particular installation.

If this device does cause harmful interference to radio or television reception (which can be determined by turningthe device off and on), we encourage the user to try one or more of the following measures to correct theinterference:

· Reorient or relocate the receiving antenna.

· Increase the separation between the equipment and the receiver.

· Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

· Consult the dealer or an experienced radio/TV technician for help.

Any changes or modifications not expressly approved by the responsible party for compliance could void the user's authority to operate the equipment..

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.
